70: Mold Solutions

Several months ago I was under my house, which is 16½ years old, and noticed a coating of light to moderate mold/mildew on the joists. After talking to your representatives Tommy Davis and Lance Tucker, and finding out how reasonable your rates are, and how good your warranty is, I decided it would be a good idea to have the house treated.

After the house was treated not only was the mold/mildew problem solved but so was my congested head.

For approximately two years I would awaken with congested sinuses, after a couple of hours and getting out of the house it would clear up.

After just one week of treatment my congestion problem was totally cured.

Thank you
